RESIDENTIAL DEMOLITION/MOVE-OFF QUESTIONNAIRE

This questionnaire is designed to help determine applicability of a project to the National Emission Standards for Hazardous Air Pollutants (NESHAP), Shelby County Air Code Section 3-25 / Memphis City Air Code Section 16-81, Standard for Demolition and Renovation (Reference State of Tennessee 1200-3-11-.02). This questionnaire offers assistance for determining regulatory applicability in a majority of situations, but does not cover every scenario.

Project Address: \_\_\_\_\_

	Yes	No
1. Will the demolition/move-off project involve more than a <u>single</u> residential building on this parcel, adjoining parcels, the same block, or specific geographic boundary?	_____	_____
2. Will the residential building be burned by a municipal fire department for training purposes?	_____	_____
3. Is the building being demolished/moved, currently being used and/or has it been previously used commercially, or by an industrial business, or an institution, or a public entity?	_____	_____
4. Is the demolition/move-off part of a larger commercial or public project (e.g., urban renewal, highway/road construction, shopping mall, industrial facility, or other private development) or installation that involves more than one residential building or a combination of residential and non-residential buildings?	_____	_____

If you answered "**Yes**" to **any** of the above questions, at least ten (10) working days prior to the start of the demolition/move-off, complete and submit the following to the Asbestos NESHAP Program using the address at the top of this page:

- A complete "Asbestos NESHAP Notification of Demolition and/or Renovation" form for each building, structure, or project;
- A One Hundred Thirty Dollar (\$130.00) notification fee; and
- Written proof and results (an asbestos survey report) that the affected facility has been inspected for the presence of asbestos-containing materials.

If you answered “No” to all of the questions above, **it is likely but not certain**, that the asbestos NESHAP does not apply to the project. Also, and **please note**, completion of this questionnaire does not relieve the owner from the requirements of the asbestos NESHAP regulation.

If uncertain about how to answer the questions above, want to know more about the asbestos NESHAP requirements, have safety concerns regarding asbestos-containing materials, or want to receive the "Asbestos NESHAP Notification of Demolition and/or Renovation" form, please contact:
