Lack of coordinated efforts in public health is a major barrier in Shelby County.

In Shelby County, Blacks die more often than Whites from heart disease, HIV/AIDS, cancer, and diabetes.

1 in 5 Shelby County residents feel they have inadequate social support. That’s enough people to fill the Fed Ex Forum.

The number of Shelby County residents with diabetes would fill a string of MATA buses along Poplar Ave from downtown Memphis to Collierville.

If we held a minute of silence for each violent crime in Shelby County from 2004 to 2010, we would not hear a single pin drop for 9 days.
